

BOSCH ESI [tronic] 2.0 Software Solution

Merlin Diesel Systems are a national distributor of Bosch Test Benches and Tooling for the independent diesel network in the UK and Ireland.

The **ESI [tronic] 2.0 Software** sets new standards in workshop diagnostics software. It enables faster, more efficient and more effective maintenance, service and repairs than ever before.

The **ESI [tronic] 2.0** also presents more opportunities for workshops to increase their workload, increase their customer-satisfaction levels and in turn increase their all-important customer-loyalty.

With the capability and option for add-on modules as your business grows, the ESI[tronic] 2.0 Online is the diagnostics software of choice for all leading workshops.

The benefits of ESI[tronic] 2.0 at a glance

- Control unit diagnostic with the latest data for cars, transporters, trucks and motorcycle systems
- Vehicle identification via VIN
- All necessary data for quick and easy repair and maintenance according to manufacturer specifications
- Supports the Bosch workshop networking concept: Connected Workshop
- Regular online updates are downloaded in the background while the device is in use
- All necessary steps are always presented in an easy and understandable manner
- Comprehensive database of the most common control devices enables efficient analysis
