

# BOSCH KTS ECU Diagnostic Tools

**Merlin Diesel Systems are a national distributor of Bosch Test Benches and Tooling for the Independent diesel network in the UK and Ireland.**

We are pleased to be able to offer the **KTS ECU Diagnostic Tool** range from Bosch to our valued customers.

For 30 years, Bosch diagnostic solutions including KTS and Esitronic workshop software have been easing everyday workshop life. ECU diagnosis started on cars of three manufacturers; today, vehicles of more than 150 makes can be diagnosed. Perfectly set for the future using the latest KTS generation.

With vast and continually updated system databases, the Bosch ECU tools enable you to control, diagnose, troubleshoot, repair and maintain your customers' vehicles, whatever they drive.

To date the KTS diagnostic testers allow workshops to perform control unit diagnoses from more than 90,000 vehicle models of more than 150 different makes.

Quarterly updates that were originally on CD and then on DVD, are now mostly online and make sure workshops are always provided with up-to-date diagnostic data that is suitable for even the latest vehicle models and control units.

In conjunction with the Bosch ECU Diagnostic Tools, Merlin are able to offer the latest Bosch ESI[tronic] 2.0 Software Solutions.

The ESI[tronic] 2.0 software sets new standards in workshop diagnostics software. It enables faster, more efficient and more effective maintenance, service and repairs than ever before.
