

MERLIN INJECTOR EXCHANGE

COVERING CAT AND PERKINS

Merlin are pleased to offer a new to range EUI injector exchange program covering both Caterpillar and Perkins applications.

After extensive work in our Research and Development Department, we are able to offer a number of Exchange injectors reconditioned with the upmost precision, creating several new to UK market references.

Following on from our recent appointment as authorised distributors for aftermarket parts specialists DISA & Robiel for the UK and Europe, we are able implement a reconditioning program that utilises the highest standard of parts in conjunction with our in house test-plan creation team.
