

FILTER RANGE

For all your plant and commercial vehicle requirements

We stock a comprehensive range of 100% OEM quality oil, fuel, air and hydraulic filter products for the automotive aftermarket. This complements our traditional background of fuel injectors, fuel pumps, diesel fuel injection components and test equipment.

We can cater for any of your plant and commercial requirements from the latest Euro 6 common rail to older examples of equipment. Be it Plant, Commercial, Agricultural Specialist Industrial or Automotive.

We can ensure the right part for the right job at the right price

Supplying filters for the world's leading manufacturers:

4000 different filter references in stock to help protect and improve the performance of your engine.
