

# LIGHT COMMERCIAL DIESEL VEHICLES

The Light Commercial Vehicle (LCV) is one of the biggest vehicle sectors for repair parts globally.

With over 9.5 million Light Commercial Vehicles sales worldwide in 2020, the boom in this sector is only expected to rise with the trend of online purchases and residential delivery services.

These vehicles are expected to cover more miles for longer hours and have an owner retention far beyond the average passenger vehicle. As such, the replacement pumps and Injectors are a priority for OEM (Original Equipment Manufacturers) to distribute.

**Merlin are authorised distributors for all the main OEM manufacturers:**

- **Bosch**
- **Delphi**
- **Denso**
- **Continental**

Whatever your light commercial vehicle fuel injection needs we will hold the parts in stock for immediate dispatch.

Regardless if you run a fleet or you are an owner driver, If you own a small Service garage or a diesel workshop, we have the parts you need to keep these vehicles on the road and putting in miles.

## Popular Light Commercial Vehicle Manufacturers parts we hold in stock
