

Environmental Policy

Merlin Diesel Systems including all its divisions, are committed to uphold its reputation as one of the World's leading aftermarket suppliers of diesel fuel injection products and test equipment.

Through this environmental policy Merlin Diesel Systems Ltd makes a commitment to:

- ✓ The protection of the environment through sustainable resource use, including prevention of pollution and other specific commitments relevant to our operations
- ✓ Fulfil its compliance obligations
- ✓ Continual improvement of the environmental management system to enhance environmental performance

This policy provides the framework for setting and reviewing environmental objectives and targets that can be measured and analysed. Our policy will be communicated to all employees and suppliers working on our behalf to ensure that they are aware of our environmental policy.

This policy is available to interested parties via our website www.merlindiesel.com. This policy is reviewed annually for continuing suitability during formal management reviews.

Full facilities are afforded to customer's representatives and approving organisations in carrying out any assessment of the environmental management system operation.

Significant Environmental Impacts:

- + **Sustainable manufacturing** of diesel injectors and fuel pumps extending the working life of these parts in line with OEM specifications, through economically-sound processes that minimise negative environmental impacts while conserving energy and natural resources.
- **Use of energy from non-sustainable sources** in the day-to-day operations of our business.

L K Bramley
